

What's That Object Called?

Keeping track of object names when you need to map lots of objects from multiple APIs is enough to drive anyone crazy. To see just how much object names can vary, we've compiled the objects from some of the most common endpoints in our API hubs:

Finance Hub

Objects

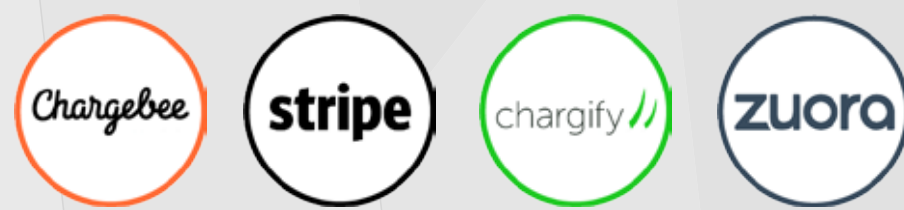

Map

```
Finance
Cloud_Elements = [ credit-terms, Customers, Employees, Invoices ];
MSFT_GP = [ 'PaymentTerm', 'Customer', 'Employee', 'SalesInvoice' ];
Netsuite = [ 'credit-term', 'Customer', 'Employee', 'Invoices ' ];
Qb_Online = [ 'term', 'Customer', 'employee', 'Invoices' ];
Qb_Enterprise = [ 'terms', 'customer', 'employee', 'invoice' ];

Cloud_Elements = [ Payments, Products, Vendors ];
MSFT_GP = [ 'Payment', 'Item', 'Vendor' ];
Netsuite = [ 'Payment', 'Product', 'vendor' ];
Qb_Online = [ 'Payment', 'item', 'vendor' ];
Qb_Enterprise = [ 'recievepayment', 'item', 'vendor' ];
```

Payments Hub

Objects

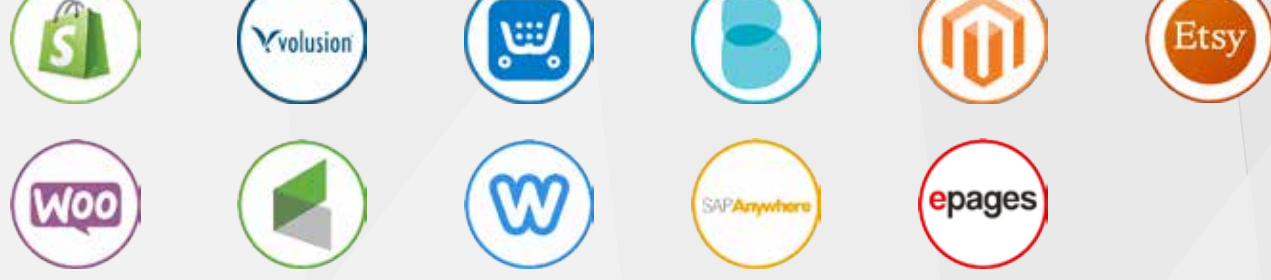

Map

```
Payments
Cloud_Elements = [ Subscriptions, Transactions, Customers ];
Chargebee = [ '-----', 'Transactions', 'Customers' ];
Stripe = [ '-----', '-----', 'Account' ];
Chargify = [ 'Subscriptions', 'Transactions', 'Customers' ];
Zuora = [ 'subscriptions', 'transactions', 'Accounts' ];

Cloud_Elements = [ Plans, Invoices, Products ];
Chargebee = [ 'Plans', 'Event', '-----' ];
Stripe = [ 'Order', 'Event', '-----' ];
Chargify = [ '-----', '-----', 'Products' ];
Zuora = [ '-----', 'invoice', 'product' ];
```

E-Commerce Hub

Objects

Map

```
E-Commerce
Cloud_Elements = [ Customer, Orders, Products, Discounts ];
Shopify = [ 'Customer', 'Order', 'product', 'Discount' ];
Volusion = [ 'Customers', 'Orders', 'Products', '-----' ];
Ecwid = [ 'Customer', 'order', 'product', '-----' ];
BigCommerce = [ 'Customer', 'Order', '-----', '-----' ];
Magento = [ 'customers', 'orders', 'products', '-----' ];
Etsy = [ 'users', 'receipts', 'listings', '-----' ];
WooCommerce = [ 'customers', 'orders', 'products', 'coupons' ];
Infusionsoft = [ '-----', 'orders', 'products/search', '-----' ];
Weebly = [ 'members', 'orders', 'products', 'coupons' ];
SAP_Anywhere = [ 'Customers', 'SalesOrders', 'Products', '-----' ];
ePages = [ 'customers', 'orders', 'products', '-----' ];
```
